PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER:	8915	SESSION NUMBER:	01
DATE OF SESSION:	06 JUN 89	DATE OF REPORT:	06 JUN 89
START:	1119	END:	1147
METHODOLOGY:	CRV	VIEWER ID:	003

1. (S/NF/SK) MISSION: To determine and describe the key functions and supporting activities of a target consisting of structures represented in overhead photography.

2. (S/NF/SK) VIEWER TASKING: Encrypted coordinates 623826/696347 only.

3. (S/NF/SK) COMMENTS:

a. Inclemencies: None reported.

b. 003 appeared to acquire the target well, but something about the site drove 003 into AOL about "Khomeini's funeral". I assured 003 that this was, indeed, AOL, the target having been tasked over a month ago. However, impressions of arabic/semitic settings remained prevalent, so I decided to avoid the questions about site function and activities until a later session, to avoid AOL tainting. If these impressions return, they will be accepted. *ok*

Summary of Information

Site involves structures, water, land and groups of people. There is presently an electrifying sense of excitement about the place. The structures are huddled together, of different heights; many are squarish, but at least a few are high, with rounded/domed tops, spacious and open inside. Some of the structures are for congregating, some for living in; some serve more of a public or governmental/official function. There is a sense of self-contained community; it doesn't feel political or technical in any particular fashion. The people are non-US, move around individually or in groups; there is a sense that at least some of them wear long, flowing clothing or robes, and some have beards. There is a sense of third world culture and religious base. The people have a sense of seriousness or solemnity, brought about by some current occasion. Black and very white white are significant at the site. Surrounding terrain is open, rolling, hilly, with an arid, almost desert climate. There are scrubby bushes, and the ground has a dry, rocky, crumbly surface. There are specific boundaries to this site, that is, where it "ends"/"starts" and where "other" begins/ends.
